

Soft Grip cable ties and mounts for flexible and efficient fluid management

MADE FOR REAL 

UNIQUE CABLE TIE AND MOUNTS FOR FASTENING HOSES, PIPES & CABLES

2-piece fixing ties for strong hold on smooth bundles

Soft Grip is a twin shot cable tie made from robust PA66HS with an integrated TPE inner layer. This soft material inhibits lateral movement on smooth hoses, pipes and cables and helps minimise rattling caused by vibration. A pre-locking feature enables temporary bundling before final closure. Repeatable tensioning and flush cutting at the tie head are possible with the EVO9 SG hand tool. Soft Grip cable ties are combinable with Soft Grip mounts (see over). One Soft Grip fixing tie can replace multiple P-Clamp diameters or reduce the cost of application-specific part development.
